

# Clean your life with

ISOKOR

# Nanotechnology of the future

**Categories of products:**

**Premium class cleaning supplies** ☼

**Premium class impregnation supplies** ☼

We know how the goods you possess are important to you.

We know that you worked hard for it.

We esteem your effort, that's why we want to show you the unique possibility to take care of them and keep them safe.

Get to know the advanced ISOKOR products.

**ISOKOR Ireland is an exclusive distributor of innovative nanotechnology products  
ISOKOR Sp. z o.o., an exclusive ISOKOR importer.**

**We offer full range of services in the professional application of nano-coat with  
ISOKOR products on any surface.**

# What makes ISOKOR products so special?

- ✦ Easy to use
- ✦ Incredibly effective and efficient
- ✦ Safety - PZH certification
- ✦ Innovative formula - water-based products
- ✦ Universality - for both house and industry
- ✦ Products 100% ecological, biodegradable, antibacterial

... and the life  
is easier

# premium class cleaning supply

effectively degreasing and spot removing

**SOKOR Cleaner** is an universal, gentle for leather, antibacterial fat removing water-based cleaner.

100% ecological, 100% natural and 100% biodegradable, safe for people and animals. It has PZH certificate and european antibacterial certificate.

## **Examples of application:**

- kitchen hood, sink, pots, pans cleaning,
- fabrics cleaning, eg. removing spots from clothes, tablecloths, upholstery,
- floors cleaning,
- industrial machines, coachwork, engines cleaning,
- polished and unpolished glass, pottery, plastic materials, varnished surfaces, stainless steel, chrome cleaning.

## **Available in packets:**

100ml, 500ml, 1000ml, 5000ml.

# ISOKOR Cleaner

Shake before use the ISOKOR CLEANER product. If the surface is very dirty, there may be the need to repeat the process of cleaning. ISOKOR CLEANER spray and rub onto the whole surface. The product should be applied for no longer than 3-5 minutes, it cannot dry. Well wipe and rinse the dirt and the product. If the surface is very dirty, it's easier to clean it with the brush or sponge. When the surface is clean, degreased and dry, you can apply ISOKOR impregnation supplies.

**Storage:** In the original closed packet, in temperature 5-35°C. Protect against direct sun radiation. Protect against freeze! The product should be used within 2 years from the date of production.

# ISOKOR Cleaner

# premium class cleaning supply

effectively cleans concrete and brick-built surfaces

**ISOKOR Cleaner** is an elevation cleaning supply without any chemicals, 100% ecological, biodegradable, antibacterial. Effectively removes dirt, algae, mould, moss and lichen and it's totally safe for health and the environment.

## Examples of application:

- elevation cleaning,
- roofs cleaning,
- paving stone cleaning,
- removing of moss, lichen and algae,
- fences cleaning,
- cleaning of brick-built surfaces.

**Available in packets:**  
5000ml.

# ISOKOR Cleaner

## Fasada

Shake before use ISOKOR CLEANER Fasada. Best apply with the pressure washers.

When the surface is clean, degreased and dry, you can apply ISOKOR impregnation supplies.

**Storage:** In the original closed packet, in temperature 5-35°C. Protect against direct sun radiation. Protect against freeze! The product should be used within 2 years from the date of production.

Isokor company offers full service of cleaning and impregnation of the elevation of both detached houses and bigger buildings, there's a possibility of high work.

We specialize in ecological elevation cleaning and we offer competitive prices in relation to the prices of chemicals available on the market.

The products are completely save for the surfaces. We provide a guarantee on our services.

## Fasada

# premium class cleaning supply

## effectively removes limescale

**ISOKOR Descaling** is limescale and dirt removing product. Its optimal composition enable limescale with all the dirt removing.

Don't use for: rubber, fabrics, leather, wood, absorbent mineral surfaces and metals, except for stainless steel and chrome.

It has PZH certificate and european antibacterial certificate.

### **Examples of application:**

- grout cleaning,
- bathroom fixtures cleaning,
- shower cabins cleaning,
- bath cleaning.

### **Available in packets:**

100ml, 500ml, 1000ml, 5000ml.  
With atomizer.

Composition in accordance with EU provision 648/2004: contain <5% surfactants cations.

# ISOKOR Descaling

Shake before use ISOKOR DESCALING. Best apply with pressure washer (atomizer). Rinse and dry after use.

When the surface is clean, degreased and dry, you can apply ISOKOR impregnation supplies.

**Storage:** In the original closed packet, in temperature 5-35°C. Protect against direct sun radiation. Protect against freeze.

The product should be used within 2 years from the date of production.

## **Precautions:**

Keep away from children

Keep in closed packaging

Do not inhale the vapours

Wash your hands with water and soap

After use in case of swallowing rinse mouth with water

DO NOT INDUCE VOMITING in case of skin (or hair) contact,

take the soiled clothes off and rinse the skin with water

In case of eye contact, rinse open eyes with water, remove contacts and continue rinsing. Call the doctor immediately.

ISOKOR Fabrics

ISOKOR Polisher

ISOKOR Building i ECO

# premium class impregnating supply

effectively protects fabrics

**ISOKOR Fabrics** is a nanotechnology product for impregnating and protecting all types of fabrics, coloured, natural and artificial leather, except for varnished leather. Do not use for impregnated surfaces, it can cause discolouration.

An ideal waterproof supply for maintaining suede, polished leather, nappa, velour etc.

Overalls and boots protected in proper way make them resistance against concentrated acids and alkalis.

**Consumption:** 100 ml/1-2 m<sup>2</sup>, depending on the level of absorptiveness of the surface.

### Examples of application:

- clothes, overalls, shoes protection,
- upholstery, cabriolet roofs protection,
- backpacks, suitcases, purses protection,
- ofas and chairs protection.

### Comes in:

100ml, 250ml, 500ml, 1000ml, 5000ml packets.  
With atomizer.

# ISOKOR Fabrics

Invisible coat on the surface of fabrics and leather strongly repels water and dirt. A coat of the product can resist extreme strains - it can shortly resist concentrated acids and alkalis.

Dirty fabrics become clean again after rinsing with clean water. There's a self-cleaning effect on the surfaces that are exposed to atmospheric conditions. It means that not only raindrops are removed from the protected surface, but also dirt.

## Qualities of the protected surface

strong water- and greaseproof effect,

evidently less dirt stays at the surface and the surface stays steam- and gas-permeable

invisible protective coat covers every fibre and protects

it against unfavourable impact of the environment, like dirt and humidity totally

harmless for your health no dangerous solvents

resistant to concentrated acids and alkalis (no longer than 10 minutes)

a coat of the product is resistant to UV light and abrasion

the product keeps clothes breath

## Application

The surface should be clean, dry and degreased, free from amylum and softeners.

Shake the product before use (about 5 seconds). Spray the product evenly until the

fabric is damp. Wipe the excess amount of the product (if the fabric do not absorb

everything). Use the product between 5-35°C. Drying takes 2-3 hours. The active

substances start to react chemically - the process ends after 24 hours.

During this time do not expose the surface to any mechanical or chemical factors.

After 24 hours the surface is ready to use.

## Best use before:

2 years from the date of production.

# ISOKOR Fabrics

# premium class impregnating supply

effectively protect glass, glazed surfaces and metalwork items

**ISOKOR Polisher** is a nanotechnology product that enables to impregnate glass, glazed surfaces and metalwork items, including stainless steel, chrome, varnished surfaces, plastic, gel coat.

**Consumption:** 100 ml/10-20 m<sup>2</sup> depending on the surface's absorptiveness.

### Exapmles of application:

- window glasses, mirrors, car glasses protection,
- car paint, cockpit protection,
- solar panels protection,
- washbasins, shower cabins, acrylic baths protection,
- glazed ceramic tiles protection,
- window frames protection.

### Comes in:

100ml, 250ml, 500ml, 1000ml packets.  
With atomizer.

# ISOKOR Polisher

## Application

The surface should be clean, dry and degreased before application.

**Surface preparation:** larger instances of soiling should be removed with water and cleaned with ISOKOR CLEANER - gently shake before use and apply to the surface. Apply the product on the surface with a sponge. Leave ISOKOR CLEANER to work for no longer than 3 minutes, do not let it dry. Rinse the soiling and ISOKOR CLEANER with water and dry with wiper. If the surface is not completely dry before applying the product, the process should be repeated.

**Direct application:** Apply ISOKOR Polisher on a clean, dry, degreased surface. Shake gently before use (about 5 seconds). Spray the product on the surface in temperature 5 - 30° C. Better use on small areas (40 cm x 40 cm or 2 or 3 applications aerosol from the package) and polish until dry with cotton or microfibre towel (attention: the surface should be polished, do not let the product dry itself).

**Attention:** The product cannot have contact with water and dampness while applying. The active substances start to react chemically - the process ends after 24 hours. During this time do not expose the surface to any mechanical or chemical factors.

It can be damaged especially by mechanical pressure. In this case the application should be repeated on the damaged areas.

**Storage:** In the original closed packet, in temperature 5-35°C. Protect against direct sun radiation. Pretext against freeze. Once opened, store in well-closed packages no longer than 6 months.

# ISOKOR Polisher

# premium-class impregnating supply

effectively protects elevations, brick-built  
elements

**ISOKOR Building** is a nanotechnology product for protecting concrete, classic elevation made of new materials eg. acrylic, all types of pargets, mineral surfaces, like limestone, sandstone, basalt, natural marble, granite, and other natural materials, artificial stone, brick, concrete roofs, ceramic roofs, painted wood.

## Examples of application:

- elevation protection,
- wooden garden furniture,
- grout protection,
- wooden fences, logs protection,
- small walls protection.

## Comes in:

1000ml, 5000ml packages.  
With atomizer(1000ml).

# ISOKOR Building i ECO

**Application:** Apply the ISOKOR Building product with an airbrush (low pressure) in temperature between 5-35°C in low humidity. Drying time: about 60 mins. Remove the excess of the product with a dry clean towel after 10 minutes after application. The reaction ends after 24 hours and the surface is ready to use.

During this time do not expose the surface to any mechanical or chemical factors. They may affect the lasting and functionality of the protection. The 24 hours after the product was applied, the temperature of the surface should not drop under 3°C.

**Storage:** In the original closed packet, in temperature 5-35°C. Protect against direct sun radiation. Protect against freeze. Once opened, store in well-closed packages no longer than 6 months.

**Consumption depending on the level of absorptiveness of the surface:**

100 ml/0,7-1m<sup>2</sup> - painted wood.

100 ml/1-2m<sup>2</sup> - mineral surfaces.
